Profile

Real estate is a tangible investment. It is a currency through which we borrow, build and watch our capital grow.

In commercial real estate, all parties have the same goal-to close transactions smoothly and efficiently. They need a trusted advisor to navigate, facilitate and effectuate a streamlined and timely completion. This is where Carly comes in.

With a respect of the entrepreneurial spirit, practical advice and a personable approach, Carly helps our clients move forward in their transactions, establishing a mutually beneficial relationship between involved parties that allows for effective solutions.

Services

- > Commercial real estate transactions
- > Business acquisitions and divestitures
- > Secured lending transactions
- > General corporate matters

Do it right, and do it well. This is the underpinning principle of Carly's work. Raised in an entrepreneurial home, this standard was both modelled and taught by her father, becoming ingrained into her at a young age.

Seeing her family supported by entrepreneurialism, Carly respects and recognizes that each transaction a client enters into has a material impact on their business and their bottom line. She reflects their tenacity and determination in seeing transactions through to successful completion.

Carly also has a strong sense of philanthropy and finds purpose in giving to and volunteering with organizations such as BC Women's Hospital and Compassion Canada.

Whether it is procuring bare land, acquiring income-producing properties, purchasing industrial property or structuring a share transaction, Carly appreciates and understands the motivation and the risks that our clients take in their business and helps them succeed with the same work ethic and perseverance.
